Photomontage

- Notes:**
- 1) The photomontages aim to provide a realistic representation of the proposed development, based on the current information and photomontage methodology, and should be used to assist assessment on site.
 - 2) The turbines in this figure have been based on the following parameters: Turbine layout file: LASC0G001.WFL • Hub height: 50m • Rotor diameter: 48m • Height to blade tip: 74m
 - 3) *Ignores the screening effects of any intervening objects and forestry.
 - 4) **Direction given as bearing relative to Grid North (BNG).
 - 5) Montaged turbines face the prevailing wind direction (south west).
